Coastal Engineering 50 (2004) 241

Coastal Engineering
An International Journal for Coastal, Harbour and Offshore Engineers

www.elsevier.com/locate/costaleng

Contents of volume 50

Research Papers

Experimental study of marine pipelines on unstable and liquefied seabed
T.C. Teh, A.C. Palmer and J.S. Damgaard 1

Modelling waves and currents at the LSTF and other laboratory facilities
I.A. Svendsen, W. Qin and B.A. Ebersole 19

The reflection of oblique incident waves by breakwaters with double-layered perforated wall
Y. Li, G. Dong, H. Liu and D. Sun 47

Wave transformation by two-dimensional bathymetric anomalies with sloped transitions
C.J. Bender and R.G. Dean 61

Research Papers

A parabolic equation based on a rational quadratic approximation for surface gravity wave propagation
S. Mordane, G. Mangoub, K.L. Maroihi and M. Chagdali 85

Transformation model of wave height distribution on planar beaches
F.J. Mendez, I.J. Losada and R. Medina 97

Concentrations in oscillatory sheet flow for well sorted and graded sands
T. O'Donoghue and S. Wright 117

Eddy viscosity and Eulerian drift over rippled beds in waves
F. Marin 139

Discussions

Discussion of "Vertical variation of the flow across the surf zone" [Coast. Eng. 45 (2002) 169–198]
P. Lin and P.L.-F. Liu 161

Reply to Discussion of "Vertical variation of the flow across the surf zone" [Coast. Eng. 45 (2002) 169–198]
E.D. Christensen, D.-J. Walstra and N. Emarat 165

Publisher's note 167

Research Papers

Joint statistical distribution of two-point sea surface elevations in finite water depth
J.-B. Song, E.-b. Wei and Y.-J. Hou 169

Boussinesq-type modelling using an unstructured finite element technique
O.R. Sørensen, H.A. Schäffer and L.S. Sørensen 181

Accurate determination of internal kinematics from numerical wave model results
H.A. Schäffer 199

Porosity effects on non-breaking surface waves over permeable submerged breakwaters
C.-L. Ting, M.-C. Lin and C.-Y. Cheng 213

A discrete correction scheme for envelope approach of wave group statistics
Z. Guizhen, H. Xuren and X. Delun 225

Effects of bed perturbation and velocity asymmetry on ripple initiation: wave-flume experiments
T. Sekiguchi and T. Sunamura 231

Contents of volume 50 241
